

CDC Reports the Flu to be Widespread in PA

In light of the CDC report that the flu is widespread in PA, we ask everyone to observe the necessary standard precautions to protect the health of others, especially with the risks related to the influenza.

- The distribution of the Precious Blood for the faithful is suspended until further notice. The faith of the Church teaches that Christ, whole and entire, is received even under only one species.
- The exchange of the sign of peace may be offered without any physical contact as well with a nod to the persons nearby.
- We also ask all those who distribute the Eucharist to practice good hand hygiene by washing your hands before Mass when you check-in. If you are not feeling well, please get a substitute.
