

# BICYCLE THEFT PREVENTION

- Never leave bicycles unattended while going into homes, stores, or common areas such as parks or playgrounds.
- Use a high quality U-Lock. Place lock through frame and wheel. Remove quick-release wheel and secure it to frame with other wheel (if applicable). Additional locks (cable or chain) are helpful.
- Always lock your bike and wheels to a secure fixed object.

- Do not leave any parts or components that can be easily removed (i.e., bags, lights, quick-release seats, etc...)
- Do not leave bicycles unsecured in backyards or on sides of home.
