HOWLING AT THE MOON

Happy New Year! I hope everyone had a wonderful and safe holiday season. It's time to begin a new year and a new adventure! And this month we will be learning how to effectively communicate with one another as we Howl at the Moon!

Believe it or not, wolves don't actually howl at the moon? Instead, what they are doing is talking to one another. They could be calling their pack to hunt, telling them they are lost, or just saying hello! And each wolf's howl is unique, just like your voice. And each voice deserves to be heard. So give it a try and howl with me- Ahooooooooooooooooo!!

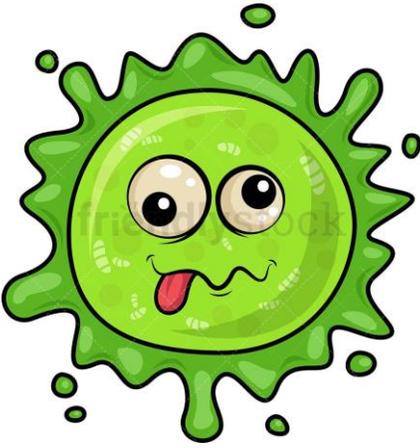

In this adventure, Wolves will learn how to become comfortable speaking in front of others as well as listening to their fellow den mates. We will learn how to communicate in ways other than using our voices, we will sing campfire songs, and we will act out a skit and maybe even make up one of our own! Please see the links below for some ideas for skits as well as the ASL Alphabet which we will need to reference for our first meeting. We will practice the tenants of the Scout Law including trustworthiness and cheerfulness.

Our meetings will continue to be virtual this month but I am including a survey to see if we feel comfortable meeting in person to perform our skits and give out earned adventure loops at the end of January/ beginning of February. Date and location to be determined based on survey results and weather.

As a reminder, there's no time like the present to start earning some of your required adventures at home. If you have completed the Duty to God Footsteps or the Protecting Your Child from Child Abuse pamphlet, please let me know so I can mark these as completed on scout book. Please see your handbook for the requirements or shoot me an email and I can go over them with you.

As always, please feel free to call, text, or email me with any questions, comments, or concerns.

Accomplishments

For the month of December, the Wolves worked on the Germs Alive adventure. They made a chore chart to keep their rooms clean, they learned the difference between a good germ and a bad germ, and they worked on a science experiment by creating mold with items they had in their home. For their efforts, they have earned the Germs Alive adventure loop!

At Home Materials
